ISOS Highlights 2011

ISOS Science Slam at the Kiel Week

In June, ISOS PhD candidates Yvonne Rößner and Ulf Evert presented their research topics on stage. Scientific communication - exciting and entertaining!

Chang in Canada

In July, ISOS PhD Chang Hong from the Walter-Schücking-Institute joined the six-week training programme 'Ocean Governance: Policy, Law and Management' at the International Ocean Institute in Halifax, Canada.

ISOS wishes you a Happy New Year!

Workshop on Marine Conservation

In August, the ISOS workshop 'Marine Conservation' on Sylt combined scientific training with insights into prospective working fields.

Kiel-Kyoto Exchange

In September, six young researchers from the Kyoto University Global Center of Excellence for Biodiversity Research came to Kiel. Working in the labs of Thomas Bosch, Thorsten Reusch and Hinrich Schulenburg for ten days, gave them an understanding of German scientific culture. And thanks to their hosts, Kiel PhD students who went to Kyoto last year, they also gained vivid impressions of the other aspects of German culture.

How to make a good paper excellent

In November, Heike Langenberg, chief editor at Nature Geoscience in London, came to Kiel to pass on her experience in presenting scientific findings to young researchers. Those who joined left with a more precise grasp of how to tune up their papers in a way that might bring them closer not only to being published but to being cited as well.
