INTEGRATED SCHOOL OF OCEAN SCIENCES

...the scientific presentation as theatre...

„At this moment, science offers an exciting path to be followed with passion and pleasure“

Prof. Carlos Pedrós-Alió is a microbial ecologist at the National Center for Biotechnology (CSIC) in Madrid (Spain). His scientific interest is to understand the ecology of aquatic microorganisms. Lately he uses genomics as a tool to generate hypotheses that can later be tested experimentally.

He also likes to study extreme or unusual environments to throw light on the functioning of more conventional ones. For example, hypersaline systems, hot springs, or the Polar waters illuminate particular aspects of the ecology of microorganisms, that are more difficult to identify in temperate marine waters.

Another interest is in understanding the diversity of microorganisms, in particular the mechanisms maintaining a large number of rare bacteria in aquatic ecosystems.

He is also interested in outreach, relationships between art and science, biology of spirituality, fiction writing and birding

Join this “Meet the Prof” event to discuss personally with Carlos Pedrós-Alió in an open, informal session.

Contact: Dr. Lucía Pita Galán, GEOMAR
lpita@geomar.de

During Meet the Prof. events you can meet – personally and informally – with top-level international scientists and experts visiting Kiel. Find out what they think are the top challenges in their field and what it takes to make a career within or outside of science. These are open events requiring no registration.
